Women on Waves - documentary viewing, Asker library

POSTED ON FEBRUARY 26, 2016 CITY WOMAN FRONT

In occasion Women's Day March 8 arranges Kvinnefronten inhouse movies Asker Library 1800 hrs on - the documentary "Vessel".

Women on Waves started as a Dutch activist group who ran a mobile abortion clinic aboard a boat. The boat docks in countries with strict abortion law, even in Europe, and perform the medical abortion in international waters. In this way, women take legal abortion.

But to help women in this way will only help very few, therefore the band decided to give women the information they need to perform abortions themselves, using drugs available in most pharmacies around the world. This was the sister organization Women on Web, which now helps women around the world.

The film gives us a touching insight into the struggle to help women to achieve the basic human right it is to decide over their own bodies.

Film om **Women on Waves** - gruppa som driver en mobil abortklinik ombord på en båt. De bruker også alle midler for å spre kunnskap om medikamentell abort. Dette er en rørende reise i kampen for å hjelpe kvinner verden over til å oppnå den grunnleggende menneskerettigheten det er å ha råderett over egen kropp.
