AMSTERDAM - At the time of Zika virus vaccine has not been found, sticking controversial solution for pregnant women are infected with a virus from *Aedes aegypti* default this.

The solution is none other than abortion. The solution was voiced a Non Governmental Organization (NGO) from the Netherlands, "Women on the Web", to prevent disorder *microcephaly* in infants born to women infected with influenza virus Zika.

Rebecca Gomperts, the founder and Director of the Women on Web said his NGO would give abortion pills for pregnant women who are infected Zika free.

Zika outbreak mosquito-borne and can cause abnormalities in babies, expanded rapidly in South America, where abortion was legalized there is limited," said Gomperts, quoted by **IB Times** (<http://www.ibtimes.co.uk/zika-virus-dutch-ngo-offers-free-abortion-pills-online-women-infected-zika-1541537>) , Wednesday (03/02/2016).
